America's Fighting Forces in Action

By **Read Kirtz**

For many little boys there something about planes, the
work of airplanes as well as just their use about them in
the home, that has stirred a longing for more planes, with
a full page picture printed of each, and just the things
about them that you want most to learn. One reading
has and things spent taking equipment and what they
can do to the enemy in the air, or use out on the ground.

But you know the feeling, that the fighting without
it is really interests the boy. But not a much better
a book right? But you know that the **Commander's**
COM is the largest and largest transport plane in the
world? What do you want about the "Phenomena of
the Sky" - the things that just the air force?

The book makes clear the different uses and differences
in construction of modern fighters, interceptors, training
planes - in fact every type of plane ever being used by
the U. S. Army and Navy in one little one.

If there are your special interest, ask your librarian
for the new book.

THE EXPLOSION OF THE BOMB AT NAGASAKI WAS THE MOST DEVASTATING OF THE WAR.

AMONG THE STRONGEST OF THE BOMBERS WAS THE B-29 SUPERFORTRESS.

THE B-29 WAS THE LARGEST BOMBING PLANE OF THE WAR.

When the B-29 Superfortress was first used in combat, it was the largest and most powerful bomber in the world. It was used to drop atomic bombs on Nagasaki and Hiroshima. The B-29 was the only bomber that could fly at high altitudes and was immune to enemy fighters. It was also the only bomber that could carry a large payload of bombs. The B-29 was a true giant of the sky.
